

Amendments to the Specification:

Please add the following two new paragraphs after the paragraph ending at page 2, line 14:

--In one aspect, there is described a computer program product, disposed in a computer readable medium, having instructions to cause a computer to use a plurality of points surrounding a first area of an image related to an area in a distortion grid, calculate at least one component of a distortion at the first area, and apply the at least one component of the distortion to a second area of the image.

In another aspect, there is described a computer program product having instructions stored in a computer readable medium, containing instructions to cause a computer to display a first image on a canvas, and responsive to an input device controlled by a user, select an area of the first image, and responsive to a selection by the user from a menu, extract at least one component of a distortion from the area, and responsive to movement and location of a cursor controlled by a user, apply the at least one component to a second area of the first image.--
